

RAUL RODRIGUES

AI Automation Developer

São Bernardo do Campo, Brazil · Relocating to Dublin, Ireland — October 2026 | raulrodrigues.mldev@gmail.com | linkedin.com/in/raulrodriguexz | github.com/RaulRodriguezx

PERSONAL PROFILE

Automation developer specialising in AI-powered workflows that remove repetitive manual work for businesses. Since 2025 I have delivered automation and B2B web solutions for companies across marketing, legal, transport and dental sectors, building lasting client relationships through reliable, high-quality delivery. Relocating to Dublin in October 2026 to study and grow within Ireland's tech ecosystem, while continuing to build automation projects.

TECHNICAL SKILLS

Automation & AI: AI-driven workflow automation, LLM APIs, n8n / Make, prompt design, RAG

Web / B2B: B2B websites, geolocation features, integrations & APIs

Programming: Python, JavaScript, TypeScript, SQL, REST APIs

Tools: Git & GitHub, Google Workspace, automation platforms

EXPERIENCE

AI Automation Developer — Freelance

2025 – Present

Self-employed, São Bernardo do Campo, Brazil

- Design and deliver AI-powered automations for businesses across marketing, legal, transport and dental sectors, streamlining repetitive processes.
- Build B2B websites with geolocation features and third-party integrations to support client lead generation.
- Earned repeat business and long-term client trust through consistent, reliable delivery — several engagements ongoing.

PROJECTS

Cover Letter Assistant

raulrodriguexz.github.io/cover-letter-api

- Live web tool that generates tailored cover letters with the OpenAI API. Static front end with a serverless Cloudflare Workers backend — no server to maintain and no API key exposed in the browser.

B2B Websites with Geolocation

Client work

- Developed B2B websites featuring geolocation to help businesses reach and route customers by location.

AI Automation for SMBs

Client work

- Automated recurring business workflows using AI, reducing manual effort across several industries.

Titanic — Machine Learning Prediction Model

github.com/RaulRodriguezx

- Machine-learning model predicting passenger survival on the Kaggle Titanic dataset, reaching ~0.78 accuracy. Built in Python with pandas and scikit-learn, with every decision documented.

EDUCATION

English Language Course

2026

SEDA College, Dublin, Ireland

Software Engineering (paused for exchange) FIAP, Brazil	2026
Youth Apprenticeship Programme CAMP SBC, São Bernardo do Campo, Brazil	2023 - 2024
Secondary Education — Completed Brazil	2025
